

# Resilience, Adaptation, Environment and Sustainability

Develop a disaster response and recovery plan to minimize recovery time in preparing actively for response to natural disasters (CRHMP)

Create awareness among residents and businesses of potential hazards especially flood risk and how they can protect themselves and their property from impacts (HMP/CRHMP)

Protect infrastructure, facilities, and natural and community assets, including critical facilities, from damage and impacts by hazards (HMP)

Reduce the carbon footprint through reduction in energy use and expansion in energy efficiency and renewable energy (SA/ACP)

Protect and restore environmentally sensitive areas and other natural resources especially coastal habitats (ACP/WIP)

Better manage and treat stormwater runoff to reduce its polluting effects into waterways (ACP/WIP/FDESS)
