Jared,  
I do NOT support this project at all.

Alderwoman Charles,  
I live in Heritage and am the Treasurer for the HOA. I have read the Mayors proposal for the "Land Swap" project. It has some nice sounding ideas but is extremely light on the financial details. Surprise, surprise. Something that seems to be a recurrent theme of this administration. Lots of ideas, lots of taxpayers money being spent, not many details. I don't buy that we won't wind up spending an enormous amount of money to build a public works facility at the Forest Drive location. This Mayor seems to think that the taxpayers are a bottomless well of money. The traffic issues associated with the construction and the ultimate relocation of personnel should be enough to make this project dead on arrival. We just went through vehement opposition to the Crystal Springs development adjacent and now you wish to propose more congestion, cars and development. NO. What this proposal is about is the Mayor, yet again, trying to sell the citizens on a badly thought out, poorly planned, expensive spending project. He claims we will somehow make money but at the pace of the spending he has no way to guarantee we won't have cost overruns that are ultimately thrust on the taxpayers. We have already endured a large tax increase recently. How many more do we have to endure before you get that the taxpayers are getting VERY tired of shouldering the burden. What are you going to do to reign in this insane spending? How many more of these projects are you going to shove down our throat? I particularly take offense to the planning meetings taking place between 2-4pm when you are well aware citizens who have jobs can't attend or listen. You also made sure that the third meeting is on one of the busiest days of the year to insure no attendance or public outcry. What are you going to do to represent the interests of Ward 3?
